

PromoPass

Anna Marthinsen, Lindsey Sexton, Fenda
Truong, and Jessica Covington

Overview

- ▶ The goal for our semester long project was to create an app that would give local small businesses an affordable edge in advertisement over larger business that have more advertisement resources. We also wanted to give those that used the *PromoPass* app a convenient way of knowing what was happening in town.
- ▶ Our main site is located at <http://promopass.root.sx>, where businesses can register their gimbal device and create their personal ads.

Features

▶ Finished Features

- ▶ Register - Web side
- ▶ Sign In - Web side
- ▶ Create Ad - Web side

What We Learned

- ▶ In the process of completing our project we were introduced to many recourses that we had never seen before or were not used to. Some of these recourses included:
 - ▶ UserApp
 - ▶ Slim Framework
 - ▶ MySQL database
 - ▶ PHP
 - ▶ OkHTTP
 - ▶ Notification Listener
 - ▶ Service
 - ▶ AsyncTask
 - ▶ Listview Adapter

DEMO TIME!
